Envirocare-A Waste Management Company

Envirocare is a project of Sustainable initiative Environmental Group, registered with Firm Registrar and FBR, with a solid vision, and goal to work "For A Better Environment", we strive to provide a total solution for industries requiring ethical, efficient and environmentally friendly waste management solutions.

Envirocare utilizes (HTI) high temperature incinerators which are of the three stage, modular package type, consisting of primary, secondary and third chambers designed to comply with Pakistan EPA emissions control regulations. Our staff also handles sensitive chemical waste, cleans chemical pits/tanks, supplies industrial equipment/machinery.

The sustainable initiative Environmental Group's innovative and progressive culture has led it to build a solid reputation amongst various industries. As a result, our subsidiary Envirocare has expanded the group reach towards management of hazardous and non-hazardous waste.

The Envirocare Approach-the difference between Envirocare and our local competitors

Ethics - There is a reason why many of the multinationals functioning within Pakistan have chosen Envirocare. There's piece of mind in knowing your company's sensitive waste is being responsibly treated and disposed of, like it should be. You can leave it with us or witness the destruction on site.

Professionalism - Our staff is trained, educated and focuses heavily on customer service and customer satisfaction. Some items will always need to be incinerated, and rest assured that our team has worked in Kuwait as a safety officer in different companies.

Management - With 7 years of experience in the Environmental Management industry; we have an experienced and knowledgeable staff, with low turnover, so we're stable, and we're confident it'll remain that way

Our facility - EPA certified. We own it, it's super clean, and we're situated in an industrial area, so we're not close to any residential towns or villages; no one is bothered by our presence. We don't contract a third party to provide incineration services, or to deal with hazardous waste, we do it ourselves. We currently run the most comprehensive incineration facility in the country. But we don't only incinerate, we can recycle, dispose, consult, you name it. You can trust Envirocare to be your ethical partner in waste management and incineration services in Khyber Pakhtunkhwa

Our rates - We are competitively priced for the incineration and waste management services we provide. There is no illegal dumping, no uncontrolled burning. We care about the environment; just ask us to find out more.

Mission Statement

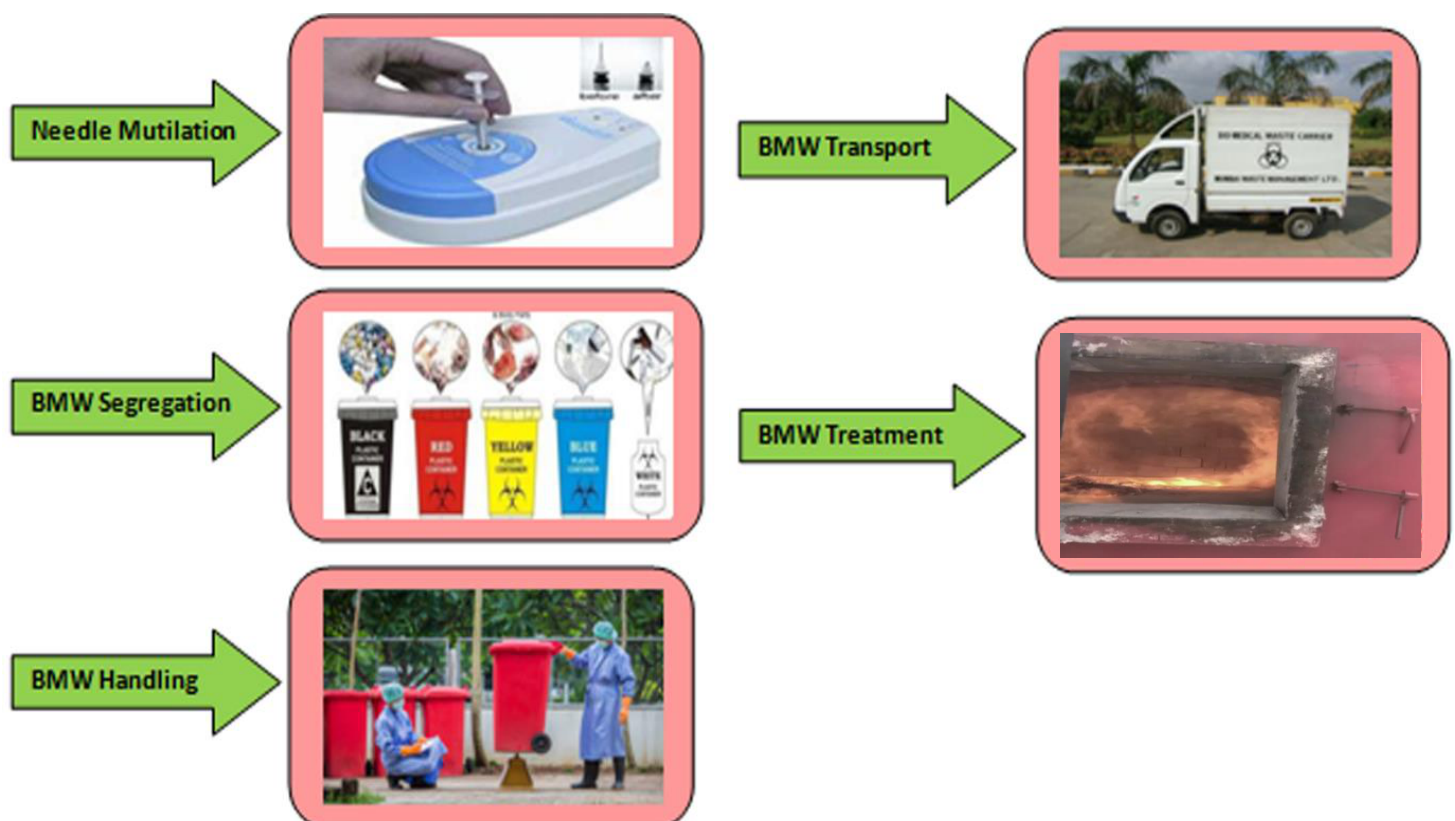

Envirocare's mission is to provide, so environment-friendly, sustainable waste management, incineration services. Requirements of the regulators while fulfilling national and international standards, because of that international and national standard we perform best.

Collection and Waste Management Services

Envirocare Waste Management- we care, is a brand of Trust & Quality waste management company collection.

Envirocare is working with the industrial, hospitals, and commercials areas of the wasteproducing industries. waste-management-in-Peshawar waste removal biomedical Medical.

But we find smart and sustainable solutions to collect, recover, safe disposal, and incineration your waste and turn the globe clean and sustainable.

Collection at Facility

Waste Management

(or waste removal) incorporates the cycles and activities needed to oversee waste from its beginning to its last removal.

This incorporates the assortment, transport, treatment, and removal of waste, along with checking and guideline of the waste management cycle and waste-related issues, advances and monetary systems.

Waste Transportation Vehicle

Envitocare-We Care,

Manages a wide range of waste, including mechanical, natural, family, metropolitan, natural, biomedical wastes. At times, waste can represent a danger to human wellbeing. Medical problems are related all through the whole interaction of waste.

Incinerator at Operational Phase

WM is that the activities and actions required to manage waste from its inception to its disposal.

This includes the gathering, transport, treatment, and disposal of waste, alongside monitoring and regulation of the waste management process.

Company is Providing the Service for these sectors because of our good waste management Skills.

In health care and hospital waste management used plastic bag. But we always care for solid waste management. We collect hazardous nonhazardous waste in different plastic bags.

Different industries Waste generated but we have cost effective waste collection management system.

After the collection of waste, we have a system for reusing recycling of waste
